DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose nor sufficiently suggest the electronic program information preparing and transmitting apparatus as disclosed in claims 87 and 115, and method as disclosed in claim 103 and 116, in which a first type of electronic program information is described with a first degree of detail which is greater, in a period covering the channel service, than a second type of electronic program information, where the first type of electronic program information concerning each of a plurality of channel services broadcast by the same broadcast service station is adapted to be distributed to each of the plural transport streams assigned to the same broadcast service station, where the second type of electronic program information concerning each channel service is distributed to the remaining at least one transport stream other than a first transport stream, and when the information is displayed, the description occupies both a period of time for a currently tuned channel service and a second period of time for a non-tuned service, the first period of time being longer than the second period of time.

U.S. Patent 5,801,753 to Eyer discloses a system in which a trickle stream and a demand stream provide EPG data (column 12, lines 30-61, column 17, lines 20-27). Title and description records for a EPG entry may be transmitted on separate streams, thus title information may be rapidly transmitted via the demand stream, and the description information may be transmitted via the trickle stream (column 17, lines 27-

35), different categories of data, including MPEG data, may have their own PID (column 17, lines 36-50). Eyer specifically fails to disclose the first and second levels of detail, and display features as required by claims 87,103, and 115-116.

U.S. Patent 5,469,431 to Wendorf discloses the transmission of a global channel map and updates as well as a band channel map which carries information describing entertainment programs for the next hour (column 3, line 45-column 4, line 58).

Wendorf specifically fails to disclose the first and second levels of detail, and display features as required by claims 87,103, and 115-116.

Claims 87, 98, 101, 103, 112, 115 and 116 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent 5,625,406 to Newberry : Unified Program Guide Interface.

U.S. Patent 5,642,153 to Chaney: Consumer Interface for a Digital Television System.
